Ideation Phase
Brainstorm & Idea Prioritization Template

Date	4 March 2026
Team ID	Team 25
Project Name	Quotes Recommendation Chatbot using NLP
Maximum Marks	4 Marks

Step-1: Team Gathering, Collaboration and Select the Problem Statement

1.1 Team:

Team Lead: Afjal Ali
Members : Amrita Pal, Akarsh Shrivastav and Aparna Pandey

1.2 Collaboration Method:

- Online brainstorming session (Google Meet)
- Idea voting through discussion
- Task allocation using Agile sprint planning
- Documentation via GitHub & Google Docs

1.3 Selected Problem Statement:

How might we help users instantly access personalized motivational, inspirational, love, funny, and success quotes through an intelligent AI chatbot instead of manually searching online?

1.4 Problem Analysis (Why This Matters?):

Current Issue:	**Impact:**
Manual quote searching is time-consuming	**Reduces user engagement**
Static quote websites	**No AI interaction**
No personalization	**Generic experience**
Lack of emotional support tools	**Missed opportunity for digital wellness**

Step-2: Brainstorming – Idea Listing & Grouping

2.1 Raw Idea Dump (No Filtering Phase):

- NLP-based chatbot using Rasa
- Quote categories (Motivation, Love, Funny, Success, Inspiration)
- Sentiment analysis to detect mood
- Personalized favorites feature
- Daily motivational notifications
- Multi-channel deployment (Web, WhatsApp, Slack)

- Voice-enabled chatbot
- GPT-based dynamic quote generation
- Gamification (Daily streak, challenges)
- Analytics dashboard

2.2 Idea Grouping

2.2.1 Core Implementation:

- Intent Recognition
- Categorized Quote Responses
- REST API Support
- Web Deployment

2.2.2 Enhancement Layer:

- Sentiment-based response tuning
- User personalization system
- Favorites saving

2.2.3 Innovation / Future Scope

- GPT-based dynamic quotes
- Voice assistant integration
- Gamified engagement
- Multi-platform deployment

Step-3: Idea Prioritization

- **High Importance + High Feasibility:**
  - Intent recognition (NLU).
  - Predefined responses (utter_).
  - REST API + Flask web interface.
  - Conversation flow (stories.yml).
- **High Importance + Medium Feasibility:**
  - Personalization (favorites, preferences).
  - Sentiment analysis.
  - Multi-channel deployment.

- **Medium Importance + High Feasibility:**
    - Feedback mechanism.
    - Gamification (daily quotes).
- **Medium Importance + Medium Feasibility:**
    - Voice-enabled chatbot.
    - Dynamic quote generation using GPT/transformers.
